

<http://xkcd.com/353/>

This course is intended for students in any major¹ who need to do analysis and visualization of data.

We will use the Python programming language and its large collection of open-source libraries to manipulate and display data from a variety of disciplines (Biology, Chemistry, Economics, Geography, Statistics, etc.) The emphasis will be on finding existing modules and tying them together to get the desired results.

No previous programming experience is required or expected.

This is a LASC QR course.

¹ This course is not intended for Computer Science majors and will not count as a required or major elective course for Computer Science majors.

CS 135 Programming for Non-CS Majors

TR 1:00-2:15pm

Dr. Karl R. Wurst
