

## Tips for getting along with neighbors/community

### Tips on getting along with the neighbors/community:

*University of New Hampshire's Community Guidebook*

- Greet your neighbors and get to know them. Remember they choose this community as their home.
- Strive to be approachable and friendly.
- Talk to your neighbors before planning a get together and let them know. Exchange phone numbers so they can call you if it gets to loud.
- Watch your noise levels. If you are living in a neighborhood with a lot of families and children it needs to be a quiet environment. Take into consideration – music, shouting, cars, traffic or late night activity.
- Keep your apartment and home clean at all times. Be respectful of the surrounding neighbors. Trash attracts animals and bugs.
- Take responsibly of your guests – make sure they are not parking in areas they should not be in. Make sure they respect your neighbor's space as well.
- Keep indoor furniture inside.
