

COLLEAGUE TIP

Do you know the difference between SAVE and SAVE ALL? And CANCEL and CANCEL ALL?

When you detail into multiple levels in Colleague, the difference between these can be very important.

When you have more than one tab open:

Save All

...will save the changes you've made on all of the Colleague tabs (REQM/RQIL/RQIM in this example).

Cancel All

...will cancel the changes you've made on all of the Colleague tabs (REQM/RQIL/RQIM in this example).

Save

...will save only the changes you've made on the current Colleague tab (RQIM in this example).

Cancel

...will cancel only the changes you've made on the current Colleague tab (RQIM in this example).
